

# Muhammad Zeeshan

Full Stack Software Engineer | C# · .NET · Angular · TypeScript · SQL Server

Gloucester, UK +44 7863 171829 Zeeshanali4854@gmail.com linkedin.com/in/muhammad-zeeshan-299a05147

## PROFILE

Full stack software engineer with **6 years** building secure, data driven web applications in **C#, .NET and Angular**. Currently delivering third party integrations (DBS, DVLA, IDVT, Konfir, Passport) for a live UK background screening platform that handles sensitive personal data under GDPR. Experienced across the full lifecycle: responsive front ends, REST and SOAP APIs, SQL Server design, CI/CD and production support. **MSc Data Science**, University of Gloucestershire (2026).

## TECHNICAL SKILLS

|                 |                                                                                                                       |
|-----------------|-----------------------------------------------------------------------------------------------------------------------|
| Frontend        | HTML5, CSS3, JavaScript, TypeScript, Angular, jQuery, responsive design, web accessibility                            |
| Backend         | C#, .NET, ASP.NET MVC, ASP.NET Web API, REST, SOAP, microservices, Python                                             |
| Databases       | SQL Server, MySQL, query optimisation, stored procedures; working knowledge of PostgreSQL                             |
| Cloud           | Microsoft Azure, AWS (foundational: hosting and deploying web applications)                                           |
| Security        | JWT authentication, role-based authorisation, GDPR compliant data handling                                            |
| DevOps & Tools  | Git, GitHub, pull request reviews, CI/CD pipelines, automated builds and deployments, Postman, Visual Studio, VS Code |
| Data & AI       | Pandas, Scikit-learn, machine learning, data visualisation, AI assisted development (Claude)                          |
| Ways of working | Agile/Scrum, code review, production support, stakeholder communication                                               |

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer

Jun 2025 to Present

Giant Group (Giant Precision Ltd) · Gloucester, UK

UK workforce compliance platform providing end to end candidate background screening

- Built and maintain integrations with **8 third party verification services** (DBS, Global Checks, IDVT, Passport, DVLA, Konfir, social media, References) in C# and ASP.NET Web API, including authentication, retries and error handling.
- Developed the **References module** end to end, automating referee outreach, response tracking and reference collection that was previously handled manually.
- Built responsive Angular and TypeScript screens for candidates and clients to track check status in real time.
- Designed and optimised SQL Server tables, queries and stored procedures for screening workflows handling sensitive personal data.
- Applied role-based authorisation and GDPR compliant data handling across all screening modules.
- Debugged and resolved production issues and reviewed pull requests within a Git feature branch workflow.
- Used AI assisted development (**Claude**) for code review and refactoring, speeding up delivery of new modules.

### Software Engineer

Sep 2022 to May 2025

Giant Group (Giant Precision Ltd) · Lahore, Pakistan

- Built and maintained compliance critical modules for the screening, payroll and onboarding platform used by UK clients.
- Integrated third party REST and SOAP APIs for payroll, onboarding and contractor compliance.
- Delivered Angular frontend features with a focus on page performance, accessibility and cross browser support.
- Set up automated builds and deployments through CI/CD pipelines and managed development, test and production environments.

### Software Engineer

Feb 2022 to Sep 2022

Lampro Mellon · Lahore, Pakistan

- Developed the Complete Gap Analysis (CGA) system in ASP.NET MVC, C# and SQL Server, from requirements to deployment.
- Built data entry and reporting screens that let clients identify and track gaps against compliance standards.

Associate Software Engineer

House Of Solutions · Lahore, Pakistan

Jul 2020 to Jan 2022

- Built **Sparrow**, a set of RESTful Web APIs secured with JWT authentication.
- Developed modules for a full cycle ERP system covering core business operations.
- Built an ecommerce application with product catalogue, cart and order management.
- Developed an inventory management system for Laban Gardens Society.

EDUCATION

MSc Data Science

University of Gloucestershire · Gloucester, UK

2025 to 2026

[Final grade, Merit]

**Dissertation:** Cardiovascular risk prediction using Python machine learning models (Pandas, Scikit-learn) predicting heart attack and brain haemorrhage risk from Fitbit wearable data.

BSc Computer Science

University of Gujrat · Pakistan

2016 to 2020

**Final project:** GPS based employee tracking system in ASP.NET MVC, C# and SQL Server.
