Muhammad Zeeshan

Full Stack Software Engineer | C# · .NET · Angular · TypeScript · SQL Server · SaaS

Gloucester, UK +44 7863 171829 Zeeshanali4854@gmail.com linkedin.com/in/muhammad-zeeshan-299a05147
Portfolio: muhammad-zeeshan-4854.github.io GitHub: github.com/muhammad-zeeshan-4854

PROFILE

Full stack software engineer with **6 years** building secure, data driven web applications and **SaaS** products in **C#, .NET and Angular**. Currently working on **iCHEX**, a multi-tenant SaaS compliance platform, delivering third party integrations and **microservices** that handle sensitive personal data under GDPR. Experienced across the full lifecycle: responsive front ends, REST and SOAP web services, SQL Server design, **CI/CD pipelines** and production support. Writes clean code guided by **SOLID principles** and uses AI-driven development tools (**Claude Code, Cursor, GitHub Copilot**) daily. **MSc Data Science**, University of Gloucestershire (2026).

TECHNICAL SKILLS

Frontend	Angular, TypeScript, JavaScript, HTML5, CSS3, responsive design, accessibility
Backend	C#, .NET, ASP.NET Core, ASP.NET MVC, ASP.NET Web API, Python
Architecture	Multi-tenant SaaS, microservices, SOLID principles, REST, SOAP, XML web services
Databases	SQL Server, MySQL, stored procedures, query optimisation, PostgreSQL (working knowledge)
Cloud & DevOps	Azure, AWS (foundational), CI/CD pipelines, GitHub Actions, Docker, Git
AI Dev Tools	Claude Code, Cursor, GitHub Copilot
Security	JWT authentication, role-based authorisation, GDPR compliant data handling
Data & AI	Pandas, Scikit-learn, Plotly, Streamlit, Flask, machine learning
Tools	Visual Studio, VS Code, Postman, GitHub, pull request reviews
Ways of working	Agile/Scrum, code review, production support, stakeholder communication

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Jun 2025 to Present

Giant Screening (Giant Group) · Gloucester, UK

iCHEX: multi-tenant SaaS compliance platform for UK and international enterprise clients

- Develop and scale **iCHEX**, a **multi-tenant SaaS** platform serving Giant Screening and a growing base of external tenants.
- Built integrations with **10 third party verification services** (DBS, iCover, NetForce, TrustID, ID3Global, DVLA, Konfir, Mistho, Yoti and FAMA) as independent services in C# and ASP.NET Web API, including authentication, retries and error handling.
- Designed modules using **SOLID principles** and a **microservices** approach, so each check deploys and scales independently.
- Built the **References module** end to end, automating referee outreach, response tracking and reference collection that was previously manual.
- Built responsive Angular and TypeScript screens for candidates and clients to track check status in real time.
- Designed and optimised SQL Server tables, queries and stored procedures for workflows handling sensitive personal data.
- Applied role-based authorisation and GDPR compliant data handling across all screening modules.
- Shipped releases through **CI/CD pipelines**; debugged production issues and reviewed pull requests in a Git feature branch workflow.
- Use **Claude Code, Cursor and GitHub Copilot** daily for code generation, review and refactoring, speeding up delivery.

Software Engineer
Sep 2022 to May 2025

Giant Precision Ltd. (Giant Group) · Lahore, Pakistan

- Built and maintained compliance critical modules for the SaaS screening, payroll and onboarding platform used by UK clients.
- Integrated third party REST and SOAP (XML) web services for payroll, onboarding and contractor compliance.
- Refactored legacy modules towards SOLID principles and reusable services, improving maintainability.
- Delivered Angular features with a focus on page performance, accessibility and cross browser support.
- Set up automated builds and deployments through CI/CD pipelines and managed development, test and production environments.

Software Engineer
Feb 2022 to Sep 2022

Lampro Mellon · Lahore, Pakistan

- Developed the Complete Gap Analysis (CGA) system in ASP.NET MVC, C# and SQL Server, from requirements to deployment.
- Built data entry and reporting screens that let clients identify and track gaps against compliance standards.

Associate Software Engineer
Jul 2020 to Jan 2022

House Of Solutions · Lahore, Pakistan

- Built **Sparrow**, a set of RESTful Web APIs secured with JWT authentication.
- Developed modules for a full cycle ERP system covering core business operations, using SQL Server and MySQL.
- Built an ecommerce application and an inventory management system for Laban Gardens Society.

PROJECTS

Invoicing Application
Personal project

C# · ASP.NET Core · Invoicing system

- Full stack invoicing application to create, manage and track client invoices, built in **ASP.NET Core** and C#.
- Layered architecture following **SOLID principles**, with RESTful APIs for invoice and client data.

Netflix Content Explorer
Data project

Python · pandas · Plotly · Streamlit · netflix-dashboard-ljo2.onrender.com

- Interactive dashboard on the Kaggle Netflix dataset; filters by type, year, genre, country and rating update every chart live.
- Cleaning pipeline with a built-in data quality report; cleaning and filtering logic in separate, tested modules.

EDUCATION

MSc Data Science
2025 to 2026

University of Gloucestershire · Gloucester, UK

[Final grade, Merit]

Dissertation: Cardiovascular risk prediction using Python machine learning models (Pandas, Scikit-learn) predicting heart attack and brain haemorrhage risk from Fitbit wearable data.

BSc Computer Science
2016 to 2020

University of Gujrat · Pakistan

Final project: GPS based employee tracking system in ASP.NET MVC, C# and SQL Server.

CERTIFICATIONS & LANGUAGES

Certifications	Languages
Angular Fundamentals (2025)	English: Fluent
DevOps Fundamentals (2025)	Urdu: Native
